PinnacleAIS to Provide Marathon with Asset Integrity Program During Construction of the Nation's Largest Refinery

February 27, 2008 – Houston, TX – PinnacleAIS, a leading provider of services and technology specializing in improved asset integrity for the petroleum and chemical processing industry, today announced that it has been selected by Marathon, a leader in the gas and oil industry, to provide Asset Integrity services during expansion of its Garyville refinery. The facility will soon have more than 425,000 bpd of refining capacity, making it the largest oil refinery in the U.S.

Under the terms of the agreement with Marathon, PinnacleAIS and its partners will implement its Mechanical Integrity program across all new assets in the Garyville refinery, including field inspection, data gathering, QA/QC monitoring, risk-based inspection (RBI) analysis, document consolidation and organization, and Meridium implementation. The initiative marks the first time that a major grassroots facility has implemented a turnkey Mechanical Integrity program during the construction phase, enabling the program to be up and running prior to startup.

“By partnering with PinnacleAIS during the construction phase of the Garyville refinery, rather than after the fact, Marathon will gain a greater and earlier return on their investment, while at the same time ensuring that the facility is operating safely and efficiently,” said Ryan Sitton, Founder and CEO of PinnacleAIS. “We are ecstatic that Marathon has chosen PinnacleAIS for such a pioneering and large-scale project, and we believe that this initiative marks a major shift in the way the oil and gas industry will implement MI programs in the future.”

In addition to its Mechanical Integrity program, PinnacleAIS provides its clients with a number of integrated solutions including Process and Operational Integrity, Compliance/Process Safety Management and Business Improvement. Each of these four key areas can be interwoven to provide a complete model that fully optimizes asset integrity.

PinnacleAIS provides the following solutions for its clients:

- Ensures the most strategic use of inspection resources
- Guarantees compliance with state and federal regulations or codes
- Assesses degraded equipment and reports on the remaining useful life of each asset
- Evaluates safety and minimizes business risks associated with asset integrity
- Develops programs that reduce costs associated with managing the reliability of assets
- Provides unsurpassed customer service

About PinnacleAIS (www.pinnacleais.com)

Based in Houston, TX, PinnacleAIS is a leading technology and services provider, specializing in wholesale improvements in asset integrity for the petroleum and chemical processing industry. Through innovative technology and world class services, PinnacleAIS offers a unique approach to asset integrity, helping operating companies realize substantial improvements in compliance and safety, while simultaneously reducing costs and business risks. PinnacleAIS is a member of numerous trade organizations including The American Petroleum Institute (API).

PinnacleAIS was founded in 2006 and is privately held.
